FROM THE GARDENS

A publication of Monk Botanical Gardens
Spring 2023

FEATURED ARTICLE

Twenty Years in the Making (pg 3)

Put on your party plants...
Monk Gardens is turning 20!

Letter from the Board President

Hello Garden Friends,

It's hard to believe that it's been 20 years since the Robert W. Monk Botanical Gardens seed was planted; we had acres of beautiful donated land, a master plan, and many ideas. Some said it was impossible. The original 2003 board begged to differ! The feature story of our newsletter includes a walk down memory lane of how the Gardens have been shaped the past two decades, and I hope you find it as impressive and informative as I do.

What a community effort we've witnessed in the past two decades; our staff and volunteers have turned "Wausau's Best Kept Secret" into a year-round destination by educating, engaging, and inspiring everyone who enters the garden gates. Here are a few ways we are doing that at the moment:

- Sara's Storybook Garden will be completed this year and will inspire everyone who is young at heart.
- Sprouts Preschool is expanding and will continue to educate children as the only outdoor school in the region.
- Summer Camp and Blossom of Lights will continue to heighten our engagement with Wausau residents and surrounding communities.
- Our volunteer list continues to grow, and these selfless people are the biggest inspiration at the Gardens!
- Our staff remains a force in educating our visitors, gardeners, and others looking to learn more about their natural surroundings.
- Speaking of our staff, a huge "congratulations!" and "thank you!" to our Executive Director, Darcie Howard, and our Education & Events Manager, Elise Schuler, on their 5 year anniversaries at the Gardens!

As I walk the Gardens in 2023, I'm thoroughly impressed by what our shared community has done in the past 20 years, and I look forward to 20 more years of the Monk Botanical Gardens making an impact on everyone who walks our beautiful paths. Sure, the Gardens is a place for blooming, but that's not limited to plants and flowers. We believe what was once "Wausau's Best Kept Secret" is now a source of inspiration, education, and engagement for all who are looking to better themselves in one way or another.

See you in the Gardens!

Susan Lang

Susan Lang, Board President

GARDENS STAFF

- Darcie Howard - Executive Director
- Linda Schill - Development Manager
- Elise Schuler - Education & Events Manager
- Marissa Ashbeck - Horticulture & Grounds Manager
- Megan Johnson - Volunteer Coordinator & Administrative Assistant
- Krysta Post - Lead Sprouts Preschool Teacher
- Sarah Loth - Assistant Sprouts Preschool Teacher
- Alicia Reimann - Assistant Sprouts Preschool Teacher
- Kaytie Ruesch - Environmental Educator
- Tyrone Lane - Groundskeeper

Officers

- Susan Lang, President
- Ann Lucas, Vice-President
- Paul Whitaker, Secretary
- Jon Plisch, Treasurer
- Nancy Cedar, Past President

Directors

- Paul David, Holly Koeppel, Jody Maier, Mark Munson, Vickie Richmond Hawkins, Sheila Rossmiller, Tammy Stezenski

Twenty Years in the Making

Written by Darcie Howard, Executive Director

Robert W. Monk III

Two decades ago, an “accidental trespassing” resulted in the Gardens concept being born.

As Darla Zastrow was enjoying a sunny day with her mom having a picnic at what she thought was a public park, a man in his 70s rode up to them in his golf cart, asking, “What are you doing on my land?” As the man, Robert W. Monk III looked closer; he realized he went to high school with Darla’s mother. As the conversation continued, Mr. Monk told Darla he wanted his land to be an educational botanical garden. Darla, a biology teacher at UWMC, suggested that he begin discussions with the UWMC Foundation. The concept of an educational botanical garden for Wausau was born.

In 2017, the Board hired me as its first full-time employee and Executive Director. Since then, the Gardens has grown exponentially from the number of volunteers and staff to curated gardens, events, and programming, to financial support. The Board has also gone through a significant shift from a working Board to a leadership Board, providing the Gardens with the connections and resources to increase its donations, memberships, and grants while developing policies and clear direction for the future.

Because of you, our volunteers, donors, and members, the Gardens has become a leader in environmental education and opened Marathon County’s first nature-based preschool in 2021. We have expanded the gardens planted by volunteers, created new gardens, and built a yurt and nature play space. We’ve also grown our staff to ten and, in 2022, hosted an incredible 64,000 visitors.

We are no longer “Wausau’s Best Kept Secret.” The days of being a hidden gem are gone, as the word is getting out that we are a flourishing garden space everyone can enjoy. The dream devised in 2003 is about to come to fruition. Thanks to your support and vision, it’s time to implement the Phase 1 garden enhancements, as part of our three phase plan to eventually build a Visitor & Education Center.

As you visit us this season, be on the lookout for additions, renovations, and changes, and know because of your financial support and donated expertise, you helped to make Robert W. Monk III’s vision come true. **Thank you!**

Breaking ground for the Potager and Kitchen Garden ◀

In 2003, the non-profit Robert W. Monk Gardens was incorporated, and the Board was created. For the next fourteen years, the Gardens was developed and maintained by a group of dedicated volunteers, many of whom are still involved. These volunteers worked tirelessly to raise funds and implement the Master Plan created in 2005. They successfully installed the Memory Circle and the Treehouse, planted trees for the Wildflower Woods, and completed Phase I of the Meditation Garden and the Kitchen Potager with an attached garden and event lawn. They allowed the public to explore the curated and wild parts of the land and provided events to attract more visitors.

ENGAGE

The Dirt: Take the Pollinator Challenge!

Written by Marissa Ashbeck

Can you imagine a world without fragrant flowers, sweet fruit, almonds, or honey? Bees and other pollinators like birds and butterflies are at the heart of our survival.

Bees, for example, pollinate **30% of the food we eat**, and native bees pollinate **80% of the world's flowering plants**. Climate change, habitat loss, pesticides, and disease are all factors affecting the population of our pollinators. How can you help? *Take our Pollinator Challenge and create a pollinator-friendly garden this spring.*

To attract pollinators, you must create an environment with food and water available all season long. You can achieve this by planting an array of native perennial plants and trees (did you know that bees get most of their nectar from trees?) with various colors, fragrances, and bloom times. These perennial plants will come back every year and naturalize to create a landscape that entices pollinators to make it their home.

Don't forget the water. Fill a bird bath or bowl with water and pebbles so the bees and butterflies have something to stand on as they rehydrate. And remember, synthetic pesticides are extremely harmful to bees, butterflies and birds, so try and use organic or natural solutions to keep away pests.

This year the Gardens will plant over 500 native perennials in the Wildflower Woods, expand the butterfly garden at Sprouts Garden Preschool, and create a pollinator plant collection in the upcoming phases of Sara's Storybook Garden.

We look forward to seeing your new gardens this year! Share photos of your hard work on our Facebook Page or send them to mashbeck@monkgardens.org.

Where can you buy native perennials that are good for pollinators? At our **Spring Plant Sale** this May. Member ordering starts May 2nd, and public ordering begins May 5th. Visit monkgardens.org/plant-sales/ for plant listings and pricing. Great way to support the Gardens and pollinators!

Want to create a buzz-worthy landscape, but need help figuring out where to start? For more information on our **Landscape Consulting** services, go to monkgardens.org/services/landscape-consulting/

THE MASTER OF THE MUD KITCHEN

Written by Elise Schuler

On a cold February day, a new student, 3-year-old Arlo, walked in wearing a thick black hat that covered his head and ears. His wariness was evident as his bright blue eyes and brown curls peered through his covered head.

After introductions and settling in, quiet and hesitant, Arlo walked over to the snow hill where his new classmates pretended to be otters as they slid down the snow-covered hill. Arlo chose just to watch.

For the next month, Arlo slowly began to open up. He was quiet and shy but learned the daily routine quickly and was a great listener. As the warm weather crept in, **Arlo found his niche.** He became the master of the mud kitchen. The more mud he could get, the better. Playing restaurant, Arlo would create various meals for his “customers,” serving his classmates who would return daily for the newest meal concoction. By the end of the semester, Arlo was leading his classmates and now friends, on wonder walks and play activities.

“Arlo has grown so much since starting Sprouts. His love for his friends, teachers, nature and himself has grown immensely. He is now a confident little boy with the biggest heart,” his parents, Brie and Tristan, gleamed as they continued to explain. “We know part of that confidence and love for others has been guided by the love from Sprouts. We have been blessed and will forever be thankful for the opportunity to be a part of the Sprouts family.”

Arlo’s experience is like so many of our Sprouts students. The uniquely crafted outdoor education program encourages and challenges students with daily activities that help them learn to listen to each other, try out being a leader or being part of a team, work out disagreements, celebrate accomplishments, support each other and assess risks. Building these soft skills sets them up for success, not only for kindergarten but for life.

This is Arlo’s last year with Sprouts. While we will miss his bright blue eyes and mud meals, we are confident he will continue to grow and be exceptional no matter where the next adventure takes him.

INSPIRE

That “Five Star” Feeling

Written by Linda Schill

“Mr. Monk gave Wausau a great jewel.”

This is just one of many five-star reviews you’ll find with a quick Google search of Monk Botanical Gardens. But more often than we care to admit, new visitors to the Gardens and online reviewers alike share that they’ve never heard of us before.

“I had no idea Wausau had a botanical garden; this place is breathtaking and so quiet and quaint.” “It’s a hidden gem!”

After 20 years of existence, how can this be? I suppose there’s truth in the saying the greatest secrets are always hidden in the most unlikely places.

On the flip side, we’re reassured and inspired by the reactions of our friends and supporters like you, when folks finally do get to know us and ultimately have wonderful things to say. The reviews don’t lie...

“Truly a gem. Enjoy an outdoor kitchen, music, vegetable gardens, yurt, tree house, trails, flower gardens, native plant gardens and activities for kids. Enjoyment for all ages.”

“A beautiful place for hiking, snowshoeing or sitting to contemplate, any season of the year.”

“Gentle walk along beautiful vegetation. Definitely soothing. Love the memorials attached to many of the plants and milestones. Looking for a walk in nature, this is worth it. There’s an actual garden which encourages the growth of sustainable substance and everlasting friendship.”

Everyone who knows us seems to really love us! So let’s start sharing this well-kept, juicy little secret together! How can you help? Spread the word about our shared **destination for inspiration!**

On the back page, you’ll find a list of spring/summer programs and events. Add them to your calendar and then share that page with a friend. Now take it one step further. **We encourage you to bring someone new to the Gardens this spring.** Walk side-by-side, hold hands amongst the trees, breathe in the cool fresh air, be entertained by the wildlife, and be inspired by the resilience of the shrubbery in its dormant stages just before they blossom green buds and brightly colored flowers.

The transition from winter to spring is an exciting time to be in the Gardens. Even Google reviewers agree, **“I love it in all seasons!”** It’s impossible not to marvel at the beauty of nature and consider it a time of renewal and growth. It can inspire anyone through any season of life they may be experiencing right now.

My favorite Google review eloquently states, **“I think that it’s a great privilege to have such a wonderful place like this in Wausau!!”** It’s so true! And in turn, it’s our great privilege to care for these Gardens to share our **destination for inspiration** with this community and beyond. Some secrets were just meant to be shared.

Our friends gave us 5 stars for our first Blossom of Lights event last fall. SAVE THE DATE... Blossom of Lights will return in October of 2023, every Thursday, Friday and Saturday night. Plus - watch for special event nights!

Volunteers of the Year Written by Jim Force

Nancy Cedar

Although Nancy is planning to leave Wausau soon to relocate closer to her family, her contributions to Monk Gardens will endure. Nancy joined our Board in 2018, connecting through her career with the Wausau School District and the Garden's preschool program. She recently served as Board President.

"I enjoyed my board service and found it very rewarding to be part of something fast-growing, that is a great community asset and will be for years to come," she says. "Education is an important part of the mission of Monk Gardens, and that means a lot to me."

Her time at the Gardens helped her transition to retirement, by providing structure and purpose. "It is hard to leave this wonderful community of Wausau," she says. "But this process of letting go of material things brings clarity to what is important in life... not things but rather people, places and experiences. That is what is special about Monk Gardens... the connections and the beauty you feel while you are there."

She has fond memories of the first Blossom of Lights event last fall. "I was there most every night and loved connecting with the volunteers and watching extended families and friends enjoying the Gardens together in a new way," she says.

Jane and Mike Blick

Jane and Mike have been volunteering since the Gardens inception, more than 15 years ago. Planting, weeding, helping with events... there isn't much they haven't done to help it grow and succeed.

Jane, formerly a member of the Master Gardeners, notes the progress made at Monk. "When we got started there wasn't much going on," she remembers. "We would plant flowers donated by greenhouses, and bring our own plants from home." It's much different now, thanks in no small part to Jane and Mike.

Volunteering at the Gardens has provided the Blicks with many pleasant experiences—from working with horticulturist Marissa, clearing the way for Sara's Storybook Garden installation, planting in the Shade Garden, to helping with office work before the Gardens hired any staff.

They helped make the first Blossom of Lights a hit with the community – rigging wires and cords, helping with parking, and acting as wayfinders along the trails. "It's fun seeing other people coming out to the Gardens and enjoying themselves," says Mike.
